PROJECTS

Procurement Management System | Java, Spring Boot, MySQL, HTML, CSS *Academic Project*

- Developed backend REST APIs using Spring Boot to manage the end-to-end procurement request workflow.
- Integrated a MySQL database and implemented full CRUD operations for procurement data management.
- Built user-facing pages with HTML and CSS to interact with the backend services.

Procurement System UI Design | Figma *UI/UX Project*

- Designed responsive screens for procurement workflows, including login, dashboard, approval, and request management.
- Created clean, user-friendly layouts with clear navigation and accessibility in mind.

Electricity Bill Generator | Java, OOP *Academic Project*

- Built a Java application that calculates electricity charges based on usage slabs using conditional logic.
- Applied Object-Oriented Programming principles to organize the billing logic into reusable components.
